# Penn State Culture and Values Survey 

## DATA TABLES RESPONSES BY DEMOGRAPHICS

## NOTES FOR READING TABLES:

Note: ECI generally excludes the "don't know" response from analysis. In order to provide the responses from all participants below, the data tables were calculated in two steps. First, responses were tabulated without the "don't know" answers. As a result, the combined response for "Strongly agree," "agree," "Neither agree nor disagree," "Disagree," and "Strongly disagree," for example, add up to $100 \%$. Those results were inserted into the tables. Next, responses were tabulated including the "don't know" answers. The "don't know" responses were then inserted into the tables.

Note: "n/a" indicates that a particular question or answer choice was not given to the indicated group. Note: Results were weighted; Penn State Overall and the Group weights differ, and therefore numbers may not add up across all rows.

[^0]:    *The "Responses" count reflects the counts of the final data set, or the "usable" cases for analysis. This includes some partially-completed survey results.
    *A significant percentage of undergraduate students did not complete the survey past the first section. The response rate for the majority of the survey for undergraduate students is closer to $5.2 \%$ ( 4,119 responses). The margin of error using the $5.2 \%$ response rate is $+/-1.5 \%$ for undergraduate students and the margin of error for the entire population remains the same at $+/-0.8 \%$.
